

MYOB RetailManager

Point-of-sale software solution for retailers

Whatever the size of your retail store or the type of business, MYOB RetailManager provides a flexible retail solution that gives you all you need to make the most of your retail business.

Designed specifically to meet the needs of modern retailers, MYOB RetailManager replaces the cash register with a point-of-sale system and retail management solution that is backed by 7 days a week support and ongoing product enhancement.

MYOB RetailManager helps you maximise your sales results and profitability by making it easy to know what's selling best, what your customers want, what's in stock and what to stock up on. And if your retail business situation changes – through growth, legislative changes or technology advances – MYOB will be there to support you with an integrated software and support package.

Suitable for any size store	For multiple outlets, simply add RetailManager Enterprise (sold separately)
Increase your profit	Not only does RetailManager tell you where your profit is coming from, but also gives you control over any discounts made. You can also monitor stock shrinkage and ring up multiple sales.
Saves you time	Take hours off a traditional stocktake with a simple data entry process and barcode scanning. Save time also with faster stock receipt and transaction entry.
Complete front to back-office solution	Integrates with MYOB business products for a complete software solution for your retail outlet, saving you hours of bookkeeping and increasing the accuracy of reconciliation and account balancing
Fully supported in New Zealand	Comprehensive support every step of the way with complete documentation, online help and a nationwide network of RetailManager Professionals.
Informative reports	You can't manage what you can't measure – RetailManager gives you back control of your store with real-time reporting; Know what's selling, who's selling it, who's buying it and when to order more.
Advanced hardware integration	Easily integrate with your POS hardware including EFTPOS terminals, scanners and touch screens.
